

Portfolio

Areas of activity

As an independent engineering company, we see ourselves as your partner, offering efficient solutions in various fields with many years of know-how:

Automotive Engineering Project Management
Adhesive Technologies

Automation Technology Plant Engineering

Adhesive Technology

Our core competence

Modern adhesive technology systems provide innovative solutions for use in industry and trade and are more than just an alternative to conventional joining technologies.

We advise and inform you about application and optimisation possibilities in your company and assist you throughout the entire process - from conception to realisation:

- Application-, process- and dosing technologies
- Process consulting, optimisation and qualification
- Customized solutions with standard components (Matching users – suppliers)
- Technical trade
